SUMMARY

I possess strong self-learning abilities and a creative mindset, with sharp analytical skills and the ability to lead and coach others. My capacity for effective time management and exceptional work ethic enable me to deliver results that drive revenue and success.

TRAININGS

CUVETTE.TECH

WEB DEVELOPMENT TRAINING ONLINE (June 2023 - Sep 2023)

- Successfully applied FULL stack technologies to develop user-friendly web applications.
- Proficient in frontend technologies like HTML, CSS, JAVASCRIPT, TAILWIND and REACT.
- Created an impressive portfolio to showcase my skillset.
- Designed various frontend projects such as landing pages, rock-paper-scissors game, and more.
- Developed a movie search app using React, React hooks, and Axios API.
- Became proficient in backend technologies including NODE.js and build server with Express.
- Acquired knowledge on how to use MongoDB Atlas and CLI.

PROJECTS

Movie Seach App

Developed a movie search app using React, React hooks, and Axios API.

To-do list - (React -app)

ToDo is a task management app with a dynamic user interface composed of React components. It utilizes React hooks for state management and offers a clean and intuitive design to help users organize their tasks and stay productive.

Rock-paper-Scissors

The game involves players clicking on either the "Rock," "Paper," or "Scissors" buttons to make their selection, while the computer generates a random choice.

Portfolio

A port folio website that showcase my skills.

Furthermore, there are numerous other projects available on GitHub, including a love calculator, a calculator that uses C programming, a credit-card validator, and many more.

WORK EXPERIENCE

Looking for my first experience in tech-field
